EXPERIENCE

Software Engineer

Cicada Green Consultants

March 2023-Sep 2026

Redi4 Team

- Migrated a **153-component Angular application from v9 → v19**, resolving breaking changes and third-party library compatibility issues; reduced **frontend build time from 10–15 minutes to ~2–3 seconds**.
- Refactored the frontend by centralizing CSS, removing unused styles/imports, and moving business logic to APIs; reduced the **frontend build footprint from 137 MB to 47 MB** and application load time from **5–10 minutes to ~5–7 seconds**.
- Designed and implemented **asynchronous background processing** using .NET background workers and a database task queue, reducing client/site creation response time from **~30 minutes to seconds** while document generation continued in the background.
- Reduced PDF generation time from **~67 seconds to ~9 seconds (87%)** through batched database queries, parallel HTML-to-PDF processing, and in-memory caching; optimized API data access by eliminating **N+1 queries** and database operations inside loops.
- Developed frontend and API features for **authentication, hierarchical RBAC across 5 roles, MFA, notifications, audit logs, dashboards, forms, documents, and data grids**, covering **13 major application areas**.
- Improved frontend maintainability by replacing any with **TypeScript interfaces**, resolving **2,000+ ESLint issues**, and implementing **server-side pagination for 10,000+ records**; participated in code reviews, defect fixes, and production releases.

Web Developer, Intern

Damsoft Private Limited

Sep 2022-Dec 2022

- Developed **React.js UI components** for the Admomena client website using **React Hooks and Bootstrap**, building responsive layouts and fixing UI issues across desktop and mobile views.
- Implemented **React Router for navigation and Redux for state management**, integrating components across multiple website sections and maintaining consistent application behavior.

PERSONAL PROJECTS

Cine Fest

[Live Demo](#) | [Source Code](#)

- Developed a **responsive movie streaming platform** with React.js, Redux Toolkit, Tailwind CSS, Firebase Authentication, and TMDB APIs, implementing authenticated access, movie discovery, search, and trailer functionality.
- Built an **AI movie search feature using the Gemini API** that processes natural-language queries, generates movie recommendations, fetches matching movie details from **TMDB**, and displays the results as a dynamic movie list.
- **Reduced redundant TMDB API calls through memoization** of previously fetched movie data; implemented reusable custom hooks and component-based architecture and centralized form validations and error/success messages, added **Vitest + React Testing Library** tests, configured **Firebase CI/CD**, and achieved **97 Performance, 100 Accessibility, and 100 Best Practices** Lighthouse scores.

EDUCATION

B.Tech, Electronics & Communication
Engineering

Guru Gobind Singh Indraprastha
University, Delhi

Sep 2018-Jun 2022
Percentage: 71.64%

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS
- **React Ecosystem:** React Hooks, React Router, Redux Toolkit, Context API
- **Web Development:** REST APIs, API Integration, Authentication, Role-Based Access Control (RBAC), Formik, Yup
- **Testing & Code Quality:** Jest, React Testing Library, ESLint, Unit Testing
- **Backend & Database:** .NET 8, SQL Server, Entity Framework Core
- **Tools & Cloud:** Git, GitHub, Vite, Parcel, Redux DevTools, Firebase, AWS
